

MODULE 2 – Creation of Institution Details Table

Custom table and fields

ServiceNow Lab – Script-Controlled ACL

Objective

- Create the custom table u_institution_details and prepare student records for ACL testing.

Create the Table

- Open Application Navigator.
- Search for System Definition → Tables.
- Click New.
- Label: Institution Details
- Name: u_institution_details
- Extends table: leave it false / do not extend another table.
- Click Submit.

Create the Fields

Field	Type	Values / Notes
Student Roll Number	Auto Number	Automatic number
Student Name	Reference – User	Reference to User
Faculty Name	Reference – User	Reference to User
Branch	Choice	ECE, EEE, CSE
Email	String	Email value
Phone Number	String	Phone number
Description	Multi Line / Multi String	Description text

- Save the table after creating the fields.

Create Test Records

- Open the Institution Details / Student Records list.
- Create multiple records.
- Use different Branch values such as ECE, EEE and CSE.
- Keep at least one EEE record and records from other branches for verification.

Expected Result

- The custom table contains the required fields and multiple records with different branch values.
